INTERNSHIP

Intern, KNOXPO, Surat July 2019 – June 2020

- Worked on final year project “Go Drive”, which aims to fulfill missing digital platform for driving school. Got training regarding Angular, NodeJS, Firebase technology.
- The responsibilities were software development, project monitoring, error detection and provide solution.
- I acknowledged the primary exposure to corporate environment very promising.

PROJECTS

Library Management [Java, MySQL, MySQL-JDBC Connector] Jan 2017 – Apr 2017

- This system allows users to find book availability in library by search feature.
- User can add, modify and delete book details into the database. Can add students records upon issue of a book. Shows record issue date, return date and penalty.

Photo Gallery Website [Html, CSS, Bootstrap, JS, PHP] May 2018 – July 2018

- Web site provides variety of photos like animals, nature wallpaper, cinema actors etc.
- User can download pictures what they desire

Student Management System [Android, MySQL, PHP] Apr 2019 – Aug 2019

- Developed an application which provide services for students to make their work quick and easier.
- Implemented various features such as student profile, document requests, and appointment booking to make the system resourceful and reliable.
- Used MySQL for better collaboration, and worked on sprints to keep the track of data.
